

Sprint Retrospective, Iteration #1

Context Project: HI

Group: CondExt Team (2)

User Story	Task	Member responsible for the task	Task Assigned To	Actual Effort	Estimated Effort	Done	Notes
We need to determine the requirements for our project	Make requirements questions	Luke	Iedereen	1 hour	1 hour	Yes	
	Collect and document the questions	Luke	Luke	< 1 hour	1 hour	Yes	
We need to research the tools and hardware that we will be using	research and install Unity3D	Luke	Iedereen	2 hours	2 hours	Yes	
	research and install .NET 3.5	Jasper	Iedereen	0 hours	1 hour	No	Does not apply
	C# research	Arjan	Iedereen	1 hour	2 hours	Yes	
	Leap Motion research	Bart	Iedereen	< 1 hour	1 hour	Yes	
	Manus VR research	Jasper	Iedereen	< 1 hour	1 hour	Yes	
	Kinect research	Jasper	Iedereen	< 1 hour	1 hour	Yes	
We need to setup the project	Setup GitHub Repository	Matthias	Matthias	< 1 hour	1 hour	Yes	Setup by Luke instead due to complications
	Document Definition of Done	Bart	Arjan Bart	1 hour	1 hour	Yes	
We need to make a product plan	Document Product Vision	Luke	Luke	1.5 hours	1 hour	Yes	
	Document Product Backlog	Jasper	Jasper Luke	1.5 hours	2 hours	Some	Wrong definition of product backlog assumed
	Document Product Roadmap	Matthias	Matthias	1 hour	1 hour	Yes	

Problems

Description: Matthias setup a git repo, but did not add everyone as collaborators. With his time constraints he could not change this on time, therefore the backlog could not be pushed to the repo.

Reaction: Luke set up a new repo with the backlog included. This repo will be used from now on.

Description: Architecture Design not tasked

Reaction: Assigned task to team
